About

Senior Frontend Developer with 8+ years of experience building high-performance, scalable web applications. Strong background in modern JavaScript ecosystems mainly React, with expertise in Tailwind, design systems, and automated testing (Jest, Cypress, Puppeteer). Experienced in mentoring developers, improving code quality, and delivering reliable, user-centric solutions in complex environments.

Experience

Senior Frontend Engineer
Ewave do Brasil | *São Paulo, Brazil (remote)*   *06/2025 – current*

• Designed, documented, and standardized the React project boilerplate for Auren, enabling faster onboarding, improved scalability, and consistent patterns across multiple applications.

• Led the development of an energy-data analytics platform, increasing information accuracy and decision-making efficiency for executive leadership. Built using React, Vite, Tailwind, and React Query, following a robust and scalable MVVM architecture.

• Took on the technical leadership role for the frontend team, acting as a reference for architectural decisions, mentoring new developers, and guiding the team in best practices and continuous improvement.

Senior Frontend Engineer
INEO | *Brasília, Brazil (remote)*   *03/2024 – 06/2025*

• I led the development of an innovative platform for notary offices, simplifying the payment process for debts and emoluments and reducing bureaucratic steps, improving end-user efficiency and overall service experience.

• Boosted performance and reduced operational costs by implementing React Query with smart caching strategies, minimizing redundant requests and increasing application responsiveness.

• Architected a dual-structure frontend approach using Next.js for notary modules (SSR) and Vite for user-facing modules, optimizing infrastructure spending and eliminating unnecessary server costs without compromising performance.

Senior Frontend Engineer
Zappts| *São José dos Campos, Brazil (remote)*   *04/2023 – 03/2024*

• I led a full refactor of the GetNet card machine sales application, modernizing architecture, improving usability, and upgrading the project to Angular 14, resulting in a more stable, scalable and user-friendly solution.

• Acted as technical consultant for internal teams working with React, supporting decision-making, reviewing implementations and elevating code quality through best practices and architectural guidance.

• Created and delivered technical content, internal talks and mentorship programs for junior developers, accelerating learning, aumentando autonomia do time e fortalecendo a cultura de conhecimento dentro da empresa.

Full Frontend engineer
Framework Digital| *Belo Horizonte, Brazil (remote)*   *08/2021 – 01/2023*

• Delivered solutions for major brands — Localiza Seminovos, Drogaria Araujo, Woba e Reserva — building high-performance interfaces with React, JavaScript, HTML, CSS na plataforma Vtex (CMS e IO).

• Led and mentored junior developers and interns, supporting growth, improving code quality, and strengthening communication and collaboration inside the team.

Full Frontend engineer
Comunique-se S/A| *São Paulo, Brazil (remote)*   *04/2020 – 07/2021*

• Played a key role in building a user-centric product experience, combining front-end development and UX design best practices.

• Strengthened product usability by applying UX research insights directly into front-end implementation.

• Collaborated closely with cross-functional teams to improve interaction consistency and accessibility across the platform.

Full Frontend engineer
WF | *Osasco, Brazil (remote)*   *07/2018 – 04/2020*

• Built and maintained landing pages, websites, and promotional hotsites using JavaScript, HTML, CSS, and Bootstrap, delivering responsive and user-friendly interfaces.

• Translated design requirements into pixel-accurate implementations, ensuring visual consistency across browsers and devices.

• Integrated third-party services and frontend solutions, supporting dynamic content and business needs.

• Assisted in portal maintenance and feature enhancements, ensuring stability and continuous improvement.

Full Frontend engineer
Track&Field| *São Paulo, Brazil (remote)*   *07/2017 – 04/2018*

• Developed frontend solutions for a high-traffic **VTEX e-commerce**, supporting landing pages, hotsites, and marketing campaigns.

• Delivered responsive and conversion-oriented interfaces using **HTML, CSS, and JavaScript**.

• Built email marketing templates and supported frontend integrations within the VTEX ecosystem.

Frontend engineer
Comunique-se S/A| *São Paulo, Brazil (remote)*   *05/2013 – 06/2017*

• I started my career in technology working in customer support, providing platform assistance and delivering user training sessions.

• Collaborated closely with the development team, reporting bugs, clarifying requirements, and supporting product improvements.

• Transitioned into development by contributing to a new internal product, marking the beginning of my software development career.

• Developed initial features and maintenance tasks using PHP, HTML, CSS, and JavaScript.

• Gained hands-on experience with real-world production environments, learning best practices in debugging, code quality, and teamwork.

• Built a strong foundation in product thinking, communication, and problem-solving through direct contact with end users.

Education

Instituto Brasileiro de Tecnologia Avançada - IBTA
Bachelor, Computer science · (2015 - 2019)
